Notes to the unaudited interim results

1. Basis of preparation and accounting policies

The interim financial statements have been prepared in accordance with the AIM rules and the basis of accounting policies set out in the accounts of the Group for the year ended 31 December 2013. The consolidated interim financial statements have been prepared using recognition and measurement principles of IFRS as adopted for use in the European Union. The IASB has issued a number of IFRS and IFRIC amendments or interpretations since the last annual report was published. It is not expected that any of these will have a material impact on the Group and therefore accounting policies applied are consistent with those disclosed in the annual financial statements for the year ended 31 December 2013.

The interim financial statements are unaudited and were approved by the Board of Directors for issue on 29 September 2014. The information set out herein is abbreviated and does not constitute statutory accounts within the meaning of Section 434 of the Companies Act 2006. These interim consolidated financial statements do not include all disclosures which would be required in a complete set of financial statements and should be read in conjunction with the 2013 Annual Report. The results for the year ended 31 December 2013 are in abbreviated form and have been extracted from the published financial statements of the Group. There were audited and reported upon without qualification by Gerald Edelman LLP and did not contain a statement under Section 498 (2) or (3) of the Companies Act 2006.

The Group has not applied IAS 34 "Interim Financial Reporting" (which is not mandatory for UK Groups) in the preparation of this interim report.

The Company is a limited liability company incorporated and domiciled in England and Wales and whose shares are quoted on AIM, a market operated by The London Stock Exchange. The Group financial statements are presented in pounds Sterling, which is the Group's presentational currency.

2. Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and its subsidiary undertakings. The company did not undertake any transactions prior to 30 June 2014.

On 5 August 2014, FAIRFX Group plc listed its shares on AIM, a market operated by The London Stock Exchange. In preparation for the Initial Public Offering ("IPO") the Group was restructured. The restructure has impacted a number of the current year and comparative primary financial statements and notes. The effect of this reorganisation was to insert one new company into the Group, a new ultimate parent company, FAIRFX Group plc. The impact of the shares subscribed from the "IPO" are not included in the historical or current six months results to 30 June 2014 as the listing occurred after the period end.

FAIRFX Group plc acquired FAIRFX (UK) Limited (previously named FAIRFX Group Limited) on 22 July 2014 through a share for share exchange. For the consolidated financial statements of the Group, prepared under IFRS, the principles of reverse acquisition under IFRS 3 "Business Combinations" have been applied. The steps to restructure the Group had the effect of FAIRFX Group plc being inserted above FAIRFX (UK) Limited. The holders of the share capital of FAIRFX (UK) Limited were issued fifty shares in FAIRFX Group plc for one share held in FAIRFX (UK) Limited.

By applying the principles of reverse acquisition accounting, the Group is presented as if FAIRFX Group plc had always owned and controlled the FAIRFX group. Comparatives have also been prepared on this basis. Accordingly, the assets and liabilities of FAIRFX Group plc have been recognised at their historical carrying amounts, the results for the periods prior to the date the Company legally obtained control have been recognised and the financial information and cash flows reflect those of the "former" FAIRFX (UK) Limited group.

3. Going concern basis

The financial statements have been prepared on a going concern basis. In determining the appropriate basis of preparation of the interim statements, the Directors are required to consider whether the Group can continue in operational existence for the foreseeable future. The Directors are of the opinion that the Group and Company have adequate resources to continue in operational existence for the foreseeable future and feel it is appropriate to adopt the going concern basis in the preparation of the interim statements.

4. Segmental analysis

The revenue for the group is generated through the provision of foreign currency services and this is the sole operating segment of the group. The revenue is wholly derived from within the UK.

5. Taxation

There is no charge for current or deferred tax due to the availability of tax losses. A deferred tax asset has not been recognised as the directors do not believe it is probable that future taxable profits will be available against which they can be utilised for the foreseeable future.

6. Loss per share

The loss per ordinary share is based on a loss attributable to equity shareholders of the parent company.
